

FICHA TÉCNICA / TECHNICAL DATA SHEET

WHITE ROUND PLASTIC BUCKET WITH LID

Nominal capacity 1.18 L · Plastic container

Small-format round plastic container with lid, intended for storage, handling and dispensing of compatible materials. Product purchased through Distribuidora Planisi. As no manufacturer reference or data sheet is available, unverified parameters are expressly marked as pending confirmation.

Product	White round bucket with lid
Nominal capacity	1.18 L
Shape	Round
Colour	White
Lid	Included
Material	Plastic; PP (polypropylene) likely, subject to confirmation
TCS supplier	Distribuidora Planisi
Manufacturer	Not identified
Indicative HS code	3923 90 00 – other plastic articles for the conveyance or packing of goods
Origin	To be confirmed
Weight	To be confirmed

APPLICATIONS

Auxiliary container for temporary storage, preparation, mixing, dispensing or internal handling of compatible materials. Suitability for a specific substance should be checked against its chemical composition and conditions of use.

MATERIAL

Comparable small white round buckets are commonly manufactured from polypropylene (PP), a material widely used for packaging containers. PP is not assigned as a confirmed specification until a manufacturer reference, marking or declaration is available.

HANDLING

Keep the container clean before use. Close the lid correctly and avoid impacts, deformation or exposure to conditions incompatible with the plastic. Do not reuse for applications incompatible with the previous contents.

LIMITATIONS

No food-contact approval, UN approval, specific chemical resistance, temperature range, leak-tightness or certified recyclability is claimed for this SKU without manufacturer documentation.

TCS sheet prepared for internal product identification. PP characteristics observed in comparable commercial containers do not confirm the material of this SKU. Material, weight, manufacturer and country of origin should be verified from product markings or supply documentation.
