

FICHA TÉCNICA / TECHNICAL DATA SHEET

A640-037 STATIC MIXING NOZZLE

Accessory for SPABOND™ 730 / SPABOND™ 5-Minute · 400 ml cartridges · 1:1 ratio

Disposable static mixing nozzle intended for SPABOND 730 and SPABOND 5-Minute systems supplied in 400 ml two-component cartridges at a 1:1 volume ratio. It is fitted to the cartridge outlet to mix both components during dispensing.

PROPERTY	SPECIFICATION
Manufacturer / brand	Gurit
Part number	A640-037
Type	Static mixing nozzle
Compatibility	SPABOND 730 and SPABOND 5-Minute
Compatible format	400 ml two-component cartridge
Compatible mix ratio	1:1 by volume
Indicative HS code	3926.90
Unit weight	Not specified in the public technical documentation reviewed
Country of origin	Not confirmed in the public technical documentation reviewed

FUNCTION

Mixes adhesive components A and B as they are dispensed from the cartridge, providing a homogeneous mixture without manual mixing.

INSTALLATION & USE

Fit the nozzle securely to the outlet of the compatible cartridge before dispensing. At the start of an application, purge a small initial quantity until a uniform mixture is obtained. The nozzle is a consumable item; cured adhesive inside it may prevent reuse.

COMPATIBILITY

Part number A640-037 is listed in Gurit's current cartridge and accessory matrix for SPABOND 730 and SPABOND 5-Minute in 400 ml, 1:1 format. This data sheet relates exclusively to the mixing nozzle and not to the adhesive properties.

STORAGE

Keep clean and dry and protect from dust, contamination, deformation and excessive temperatures prior to use.

TECHNICAL NOTE

The Composite Store technical data sheet prepared from Gurit's cartridge and accessory compatibility matrix. Dimensions published for previous nozzle references have not been transferred to A640-037. Unit weight and country of origin remain subject to documentary confirmation.
